PROFESSIONAL SUMMARY

DevOps Engineer with 8+ years of experience in **AWS cloud infrastructure, Kubernetes, Terraform, and enterprise CI/CD automation**. Currently supporting **Autodesk through Accelon** in **AWS GovCloud (US)**, with a focus on Amazon EKS, platform reliability, observability, and **Spinnaker-to-Harness pipeline migration**. Previously achieved **60% faster deployments**, **70% less manual effort**, and **40% lower mean time to recovery (MTTR)** through automation and monitoring.

TECHNICAL SKILLS

Cloud Platforms: AWS GovCloud (US), AWS (EC2, EKS, ECS/Fargate, RDS, S3, Lambda, VPC, IAM, ALB/NLB, Route 53), Azure

Infrastructure as Code: Terraform, AWS CloudFormation, Ansible, YAML, HCL

Containers & Kubernetes: Kubernetes, Amazon EKS, Docker, Helm, Kustomize, Ingress, HPA/VPA, Cluster Autoscaler

CI/CD & Release Engineering: Harness, Spinnaker, GitHub Actions, Jenkins, AWS CodePipeline, CodeBuild, CodeDeploy

Automation & Scripting: Python, Bash, shell scripting, SQL

Monitoring & Reliability: Amazon CloudWatch, Prometheus, Grafana, ELK, Azure Monitor, incident response, root cause analysis

Security & Resilience: IAM, AWS Secrets Manager, KMS, Trivy, SSL/TLS, disaster recovery, AWS Cost Explorer

Databases & Storage: PostgreSQL, MySQL, Oracle, Amazon Redshift, SAN/NAS, Veritas NetBackup

PROFESSIONAL EXPERIENCE

DevOps Engineer III

May 2026 – Present

Autodesk (Client) | Accelon (Payroll Employer)

- Provision and maintain **AWS GovCloud (US)** infrastructure using **Terraform**, supporting cloud-native applications and repeatable cloud resource configuration.
- Operate **Amazon EKS and Kubernetes** environments, supporting containerized application deployments, cluster operations, and troubleshooting of rollout issues.
- Contribute to migration of deployment pipelines from **Spinnaker to Harness**, supporting CI/CD platform modernization and continuity of application release workflows.
- Support automated build and deployment processes using **GitHub Actions and Jenkins**, including pipeline operations and troubleshooting of delivery failures.
- Monitor and troubleshoot cloud infrastructure, Kubernetes workloads, and application deployments to identify operational issues and support **platform stability and reliability**.

PROFESSIONAL EXPERIENCE (CONTINUED)

Senior Associate – DevOps Engineer Jun 2022 – Apr 2026

Axtria Ingenious Insights | Clients: Merck (MSD), Johnson & Johnson

- Automated AWS infrastructure provisioning across EC2, VPC, IAM, EKS, ECS, and Lambda with **Terraform and CloudFormation**, improving provisioning consistency by **80%**.
- Built **Jenkins, GitHub Actions, and AWS CodePipeline** workflows for multiple environments, reducing application deployment time by **60%**.
- Created reusable Terraform modules and Helm charts to standardize infrastructure provisioning and Kubernetes application releases across environments.
- Deployed Docker microservices on **Amazon EKS and ECS** with rolling deployments, supporting scalable services and zero-downtime application releases.
- Automated infrastructure and deployment operations with **Python and Bash**, reducing recurring manual work by **70%**.
- Managed Amazon RDS (PostgreSQL, MySQL, Oracle) backups, performance monitoring, and database migrations completed without data loss.
- Improved observability with **CloudWatch, Prometheus, and Grafana**, reducing production **MTTR by 40%**; implemented IAM, encryption, and disaster recovery controls.

DevOps Engineer Nov 2018 – Jun 2022

The Hongkong and Shanghai Banking Corporation (HSBC)

- Maintained Kubernetes clusters for enterprise banking applications with health checks, observability, and production workload support.
- Configured **Horizontal Pod Autoscaler (HPA)** and Cluster Autoscaler to accommodate changing workloads and sustain application availability.
- Developed reusable CI/CD templates for microservice builds, automated testing, container scanning, and standardized release workflows.
- Integrated **Trivy** container vulnerability scanning and compliance checks into CI/CD pipelines to prevent vulnerable deployments.
- Managed Kubernetes Secrets and AWS Secrets Manager for application credentials and controlled access to sensitive configurations.
- Automated routine infrastructure work using **Python and Bash**, reducing operational incidents by **40%**.
- Supported incident response, root cause analysis, and vendor escalations; administered SAN/NAS storage and **Veritas NetBackup** systems.

CERTIFICATIONS

Certified Kubernetes Administrator (CKA)

HashiCorp Certified: Terraform Associate (003)

AWS Certified Solutions Architect – Associate

EDUCATION

Post-Graduate Diploma in IT Infrastructure & System Security, C-DAC ACTS, Pune

B.E. in Electronics and Telecommunication Engineering, BAMU University, Aurangabad | 2017 | Distinction
